SO [REDACTED]

At Gdynia, a school located on ulica Czerwonych Kosynierow 47 provides training in radar operation. The head of the school is a Soviet naval officer who wears a Polish naval uniform. The following are instructors at the school: Engineer Karolczak, Engineer Jagodzinski, and Commodore Kon of the Polish Navy. The course lasts about three months and there are about twenty students; the latter consists of air force, navy, and merchant marine officers. The school has several types of radar apparatus, both German and Soviet-produced; a Polish radar model is said to exist, but nothing is known about it, and no one has ever seen it.¹
